

Abstract of the Disclosure

5 A disposable diaper comprising a fluid-permeable topsheet, a fluid-impermeable
backsheet and a fluid-retentive absorbent core interposed between the topsheet and the
backsheet, the disposable diaper being formed in a substantially vertically elongated
configuration and having a stomach side, a back side and a crotch region positioned
between the stomach side and the back side, wherein a second absorbent core is
disposed at an outside region of each opposite side edge of the absorbent core at the
crotch region along a longitudinal direction of the diaper, and an elastic member is
disposed at the region where the second absorbent core is disposed along a longitudinal
10 direction of the diaper
